

GL-XE300 4G LTE Mobile Router

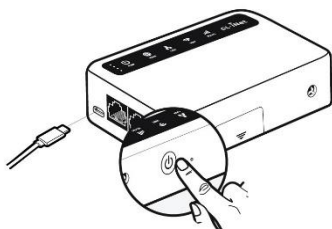

Shipment Content:

- 1 x Protective Case
- 1 x 4G LTE Router
- 1 x Type C Power Adapter
- 2 x Retractable Ethernet Cable
- 1 x Short Ethernet Cable
- 1 x Mini Ethernet Switch
- 1 x Type B Micro USB

Quick Setup:

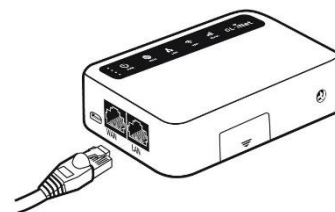

1. **Plug in the Type C cable and turn On** the router by holding the power button for 3 seconds. *Allow 5 minute for the WiFi LED to turn on. If the unit is charged it can be used unplugged for up to 4hrs. (Varies by usage)*

2. **Connect your Wired devices via the Mini Switch. (e.g., Ethernet enabled Printer)** Plug in the Micro or Mini USB to the Mini Switch and the other end of the USB Type A to the router. *This device allows you to connect to 4 wired devices via Ethernet.*

3. **Connect one of the Ethernet Cables** to the router and the other end to Port 1 of the Mini Switch. Now you can connect multiple Ethernet cables to the Mini Switch Ports 2-5 and the other end to a Printer or PC.

4. **Connect your Wireless devices (e.g., Tablet / PC)** Search with your device for the SSID (Wireless Network Name), it is labeled the top of the router The password in your *Important Documents Folder* to connect wirelessly.
5. **To connect to an Internet Hardline** simply connect an RJ45 Ethernet cable from the Venue's live port into the router **WAN** port. The router will prioritize the hardline over cellular data.

GL-XE300 4G LTE Mobile Router

Troubleshooting:

What if...

...the router does not power up?	Please make sure you are holding the Power button for at least 3 seconds. Try plugging in the unit to power and let it charge.
...the WiFi symbol does not light up /the devices can't find WiFi to connect to?	Please make sure to wait 5 minutes for the router to establish a connection, if problem persists turn the router Off and On.
...I am reaching my Data use limit.	Please contact your event manager or Choose2Rent Client Services Representative to extend your allotted Data.
...I am connected to a Hardline but have no internet.	Please confirm with the Venue that the hardline is live. Confirm the hardline is connected to the Router's WAN port and not on the LAN port. Power cycle the router after connecting it to the hardline.
